VOLUME XXXIII NO. 12

GLEICHEN, ALBERTA, WEDNESDAY JUNE 5, 1940

SUBSCRIPTION \$2.00 PER YEAR

LOCAL NEWS ITEMS OF THE TOWN AND DISTRICT

Mrs. P. Downey left for Quebec where she will visit her son Tom for a short time.

Max Yates left Sunday for Banff where he has accepted a job for the summer driving sight seeing cars.

Miss Freda MacCallum of Vancouver arrived home to visit her parents, Mr. and Mrs. J. H. Baugh.

A. R. Yates' garden is a sight to see with its beautiful lawns, trees and wealth of flowers. Anyone who loves flowers will certainly see all they could wish for there.

Wesley Desjardine and wife are visiting the former's parents Mr. and Mrs. P. Desjardine. Wesley is a member of the coast defence at Vancouver.

Mrs. Hutton of Vancouver spent a day in town last week visiting her parents Mr. and Mrs. T. H. Baugh. Mrs. Hutton with her husband were en route to Montreal where they will reside in future.

The local students who will take part in the Banff and Jasper trip meet, Friday, have been practicing every day during the past week getting into shape for the supreme test. They hope to bring home cups.

Jack Moss of Lethbridge, who is in town Sunday, it is said that Jack has joined the 22nd Battery. He is an old member of the Battery having been a member when he lived in Gleichen some years ago.

For two hours last Thursday afternoon a heavy shower fell over a wide area of the district. Although it interfered with some farm operations it was most welcome and the effects were immediate for the fields and gardens came to life and sprouted upwards.

Leith Gilbert, Denny Woods and Bert Nicholas joined the 22nd Battery last week and on Thursday passed through Gleichen with a detachment of wireless operators for Toronto where they will get more training before going overseas. A large crowd of citizens were at the station to see the boys off and presented them with many presents.

RED CROSS NOTES

The local branch of the Red Cross shipped 2 large parcels to divisional headquarters in Calgary, last week. These parcels contained: 45 pairs socks, 3 scarves, 3 sweaters, 2 quilts, 4 pairs pajamas, 7 boys' undershirts, 2 pairs boys' pants, 2 boys' suits, 3 windbreaker 1 man's shirt, 1 parka, 1 pair gloves, 4 pairs bloomers, 2 night gowns, 2 girls' sweaters. The nurses at the Indian hospital and Mrs. McQueen have made 600 surgical dressings which have been shipped this week.

There has been increased interest taken in Red Cross work in recent weeks and workers in larger numbers come every Monday afternoon to the Guide Hall, where a great deal of work has been accomplished. We do not wait for a special invitation, let your conscience be your guide, and we are sure that every woman who sees the work she wants to do her utmost to help at this critical time. We can always use more workers. Come prepared to take a hard, and if you cannot come away from home and get some sewing to take home. Every assistance will be gladly given beginners.

Many splendid donations suitable for making over into children's garments are coming in and are much appreciated. We would like more new clothing, old blankets and underwear, especially woolen materials. Please send them they are thoroughly washed and clean before bringing them in.

A very special appeal has gone out for blankets for France, either for the 25,000 hospital beds for the wounded or for the 5,000,000 refugees from devastated countries to the north. These blankets must be new and clean ones if they are in good shape and clean. These may be left at the Guide Hall—get the key at the Rum Inn Cafe. The local Red Cross branch will send them in immediately.

With the intensification of the war in France, Red Cross has now issued for more and more surgical ap-

Recruiting Men To Bring Battery To Full War Strength

Recruiting for the 22 Field Battery to bring it up to full war strength began in town Monday morning. The reported blowing up of the Vimy memorial by the Germans has brought members and former members of the Battery from all over the country flocking to the drill hall to enlist. The act of the Germans in blowing up the monument has roused the ire of all true Canadians and there seems to be little doubt that the Battery will get its quota of men before long.

Practically every Gleichen man who went before the medical board Monday passed the examination. The doctors examining the men stated that the boys as a whole were the finest bunch physical fit men they had yet looked over. No doubt the sports of all kinds and especially hockey and physical training had much to do with this.

Gleichen is proud of the fact that it is the smallest place in the British Empire to have a militia unit and a flag station.

The 22nd Battery was organized in 1921 and since that time has made a name for itself in military circles as well as in the world of sport. The Battery was formed by members of the unit and is well known in hockey in the western provinces, having won the Morgan cup twice and the provincial championship twice.

Major Dodgson, officer commanding the unit at present, stated that there had been an excellent response in mobilization and by Monday night 10 men had been accepted by the medical board. All the NCOs had volunteered and it is expected that there will be no difficulty experienced in getting the full quota in a short time.

The Battery has already a very good representation in the C.A.S.F. and claims a record for the number of officers already turned out. Former members of the unit now serving various C.A.S.F. units are: Major W. H. Taylor, O.C. 92-109 Batts; Major D. S. Harkness, O.C. 23rd Art. Battery; Major K. B. Lockett, Lt. Col. 1st Divisional Artillery; Lieut. J. A. Cook, 109th Field Battery; Lieut. G. Ledingham, Adjutant 4th Art. Regt.; Lieut. G. B. Cunningham, 2nd Art. Battery; Lieut. J. D. Dobbs, Artillery Training Centre; Lieut. W. J. Clennell, Medicine Hat; G. W. Newell, Calgary.

OTTAWA LETTER

By Dr. F. W. GERSHAW

At this session on account of the large war expenditure money will be voted only in small quantities for other activities.

The amount for P.F.R.A. is being greatly reduced. The works that have been completed and inspected will be paid for. The applications that have been approved will be proceeded with but no new work will be started this year. Surveys that have been started will be completed so that reconstruction plans will be well in hand. Surveys that have been started will be completed so that reconstruction plans will be well in hand. Surveys that have been started will be completed so that reconstruction plans will be well in hand.

The war has placed new responsibilities on all of us. It takes money, and lots of it, to carry on this the biggest war in our history. Money is necessary to save the most precious life in the world—the life of liberty.

Money subscribed now for saving certificates will be paid back in seven and half years at compound interest the government plans and this it should come at a time when lean years are expected. Certificate can be purchased at banks, post offices and other places. The Commonwealth Air Training plans. Auxiliaries supplying regimental comforts for Canadian soldiers overseas may ship them through the Red Cross, provided they are plainly marked with the name of the military unit to receive them and it location, also a record of the comforts in the name of the donor and address of the sender.

because I advocated Socialism at private losses at which a Greenup was present. In Germany all of you would be in concentration camps tomorrow."

THE RUM ISSUE

By FRED JONES
This Column Given to News of the Gleichen Branch of the Canadian Legion

Stand to!
We cannot get very much news in Seabee camp so you will not be obliged to take an afternoon off to read the Rum Issue. The mountains are quite interesting to one who has lived mostly on the prairies. The wild flowers are plentiful and many are entirely new to the prairie dweller but the rich growth of flowers growing in the original prairie grass is certainly absent here. Of course, it can freeze here any month in the year or even snow.

Since the war took such a violent turn we hear of things waking up in Germany. All the men who are able are eager to go from here to the active service units now being raised. We were very sure when we heard that Henie had busted up Vimy Memorial. Nearly every man who did not go to France saw Vimy and if they got to live in Vimy they would be glad to go to the front. The German army is violating every other law of humanity so one or two more despicable acts will not be wondered at.

Germany still thinks that by acts of cruelty she can scare people into giving up but the war will continue and in the long run she will be beaten just like the last time.

A few notes from the camp: Cpl. Salmon is sporting another strip—his new "sergeant's" badge. He is a corporal. On a radio program was telling an advisor that he had lost his wife by desertion. One of the boys in the hall said: "I wish he'd say where he lost her. I would take mine there." The girl was out of her room and friend said to her: "When you get to be a lance corporal you won't be cruel to men, will you?"

We hear the 22nd is mobilized. Some of the boys will be glad to hear this. One boy was heard to say that he made a big mistake.

King and that for Leopold Quilting, of the Belgians, Juana Isacuri must have turned over in his grave.

Perhaps the editor would be pleased to know that Rev. Bishop, our padre, calls around for our copy of the paper.

The other morning our adjutant entered the orderly room and surprised sixteen mosquitoes shooing their heads on the office pencil sharpener.

For a bunch of old sweaties, whose members are none to good, we get the toughest beef on earth. It must have been kept in storage from some hard winter. With all the good beef on the prairie that is about the nearest thing to a kick we could have.

We have the only guard in Canada that has to turn out twice for guard rounds. After the colonel has given the order over a heavy home comes around and checks up on him.

For a bunch of category men we are willing to bet that a smaller percentage goes on sick parade than any equal number of "A's" anywhere.

Lights Out!

THESE MEAN MORE THAN THRIFT

War Savings Certificates!
The government could have called them "National Safety Certificates." For that, in stark truth, is what they are. War Savings Certificates are what, in peace days, we might call a "fine investment." They make for thrift, lay a foundation of security, appeal to the spirit of self-

THE WORLD'S GOOD NEWS

will come to your house every day through

THE CHRISTIAN SCIENCE MONITOR

An International Daily Newspaper

It records for you the world's news, the thinking of the world, the progress of the world. It is the only daily newspaper in the world that is not owned by a single man or company. It is the only daily newspaper in the world that is not owned by a single man or company.

Address: Temple City on Maple

respect and self-reliance. On these grounds, as well as upon the grounds of democratic responsibility, of a wider devotion to the democratic creed of voluntary citizenship they meet a need.

But far more than these things, and more terribly vital, War Savings Certificates are a challenge to patriotism. They are a call to all of us, to answer the challenge of war service; a dictate of war duty which no one can ever expect to be forgiven for ignoring.

War Savings Certificates are OUR share in this war. They ask us whether, in this terrible conflict, with all that we are or ever hope to be at stake, we are content with lip loyalty to our cause; content with abuse of Hitler; unwilling to make even moderate sacrifice for the sake of all our future.

In war-racked France to day the soldiers of democracy are dying for defence. Are we willing to place them up? To deny ourselves things we can yield easily for their sake? Are we willing to contribute something to feed and arm them, to sustain their strength, to tell them that back home their peoples are supporting them?

This—this above all else—is the challenge of War Savings Certificates.

THE WEEK IN EDMONTON

(By Dan E. Campbell)

Alberta stands at the threshold of the greatest tourist era in her history. In cities, towns, mountains and lake resorts preparations are almost completed for the welcoming. (Continued on another page.)

The Mighty Atom

One can imagine with what dismay producers of power of all kinds and from all sources must have read the recent announcement from New York of the isolation in a laboratory workshop of a new chemical substance, one pound of which, to quote newspaper dispatches is said to be capable of yielding the power output of 5,000,000 pounds of coal or 3,000,000 gallons of gasoline.

Significant, indeed, of the potential destructive power and the use to which it might be put by the Germans, if they can perfect it, is the name which has been given it—the "U-235". If that were not sufficient to arouse dread, the New York Times, which first announced the discovery, declared that the German government was isolating this substance in this field being carried on in the United States and has instructed all its greatest scientists to concentrate on the problem of improving the process, "one pound of which is stated to have the explosive force of 10,000 tons of TNT". The German scientists in this field have been told to drop all other work and devote themselves to this task alone, says the New York paper.

Simple too, is the method of application of U-235 to the process of developing power. All that is necessary is to immerse some of the new isotope in cool water when it will release energy in the form of steam. The process is akin to the generation of acetylene gas. As long as water makes contact with U-235 it will supply steam and all that is necessary to stop it is to cut off the supply of water.

For Good Or Evil

While the substance, U-235, has been hoarded for some time, it is only quite recently that scientists became aware of its immense possibilities for good or evil, according to the purpose to which it may be put. As the story goes, it was in February that a professor in the University of Minnesota, was successful in isolating a fraction of a gram and subsequently a professor at the University of Columbia subjected it to tests with an atom smashing machine. Since then the yield has been increased 200-fold, indicative of possibilities of a process for isolating the substance in large quantities may soon be found.

The immense commercial and industrial as well as a warfare potentialities of the U-235 can be sensed from the statement that five to ten pounds of the substance, plentifully available in many parts of the earth, is capable of driving a battleship or a passenger liner around the oceans "for an indefinite period without refuelling".

While the destructive use of a substance as U-235, when used as a weapon of war would be so terrific as to beggar description and its holocaustic effects are almost beyond the imagination of man, its use in the arts of peace would be so revolutionary, so revolutionary, that it is true that if a process can be discovered which will enable the substance to be isolated in large quantities and cheaply, it would ruin many industries and destroy an enormous amount of capital invested in such industries as coal and petroleum. On the other hand it would make available to man a cheap source of power, almost akin to perpetual motion.

Applied to peace time pursuits one can visualize a family setting out for a trip around the world in a steam driven automobile with a full supply of power for the entire trip in something less than a pound package in the trunk or under the back seat of the car. All that would be necessary to keep moving would be to occasionally move a small tank of water at an ordinary temperature. One would be the necessity of stopping every 200 or 300 miles to instruct a gasoline station attendant to "fill 'er up".

Might Destruction

But when and if such a force, if available in quantity, were applied to the work of destruction as exemplified in the kind of warfare being waged by Germany against the Allies, the results would be too terrible to contemplate. They might be too terrible to give the oft-related mythical death ray.

In view of the ruthlessness of the Hitlerian method of conducting war on mass scale against open cities, and the German policy of slaughtering innocent women and children on wholesale scale, and of wiping out densely populated civilian centers, it is not surprising to hear that the German military machine is interesting itself in the new discovery and that the scientists of that nation have been ordered to drop everything else in the interest of further development of U-235.

In the interests of humanity and of the very existence of civilization it is to be devoutly hoped that the development of U-235 as a practical and feasible source of power will be stayed until the Allied arms have prevailed and the world has once again been made safe for the peace-loving nations of the globe.

God forbid that the mighty atom should be used to destroy democracy.

Bacteriological Research

Bacteriological research in the general field of agriculture and the related industries is now having many important applications. Bacteriology was developed first in connection with human medicine and in spite of the fact that out of the hundreds of species of bacteria known to science only a very few are recognized as causing disease, bacteriology is still connected in the lay of the Canadian farmer—Dr. J. M. Swaine, Director of Scientific Services, Dominion Department of Agriculture.

Although the feathers of silkies may be either white or black, their skin always is black. They are the Negroes among fowl.

Remains of an aqueduct built by the Roman Emperor Claudius have been found by workmen near Naples.

MIDDLE-AGE WOMEN

HEED THIS ADVICE!

Thousands of women throughout the world are suffering from the effects of the Pinkettes. The Pinkettes are a gentle laxative and are the only medicine that can be taken for over 60 years in the most reliable and safe manner. Pinkettes are available at all drug stores. 77¢ per box.

Intercept Nazi Messages

While mail of suspicious character is continually subjected to close scrutiny by censors stationed in Canada's two internment camps, a new twist in Nazi methods was discovered recently at Kanamuku Camp, in Alberta, where post-censor messages, sent from Chicago, were intercepted. These three typewritten cards carried no signature and bore only verses in German and English prophesying Nazi victory and the domination of Canada and the United States.

Two Good Deeds

When young Roland joined the Boy Scouts he thought he'd got one better than the others and do two good deeds a day.

So he had a look round to see what he could do.

First, he found a little mouse squeaking in the mousetrap and he took it out.

Good deed No. 1.

Then he found the cat was hungry, so he gave it the mouse.

Good deed No. 2.

Despite war, students of 14 nations are studying at the Sorbonne, University of Paris, including England, France, Germany, Italy, Japan, U.S.S.R., Yugoslavia and Brazil.

The amount of water that air can hold is dependent upon its pressure and temperature.

Does Not Use Them

Germany Has Never Made Anything Out of Her Colonies

The idea of a poverty-stricken and over-populated Germany was opposed by Dr. E. G. Speke, geographer of the University of Western Ontario, when he gave at a dinner meeting of the Lions Club at Stratford, Ont. Dr. Speke declared that a myth had grown up that Germany was over-populated. It was not a question of the number of people to the square mile, but a matter of how many people to the square mile that a country could support. Germany, with a population of 566 to the square mile, had absorbed the over-population claim so long and steadily that it had come to be an accepted fact. But despite claims they moved to take over two countries, Holland and Belgium, that were about twice as densely populated.

After asking whether Germany ever thought of Canada, the speaker declared that one of the best speakers ever made of Southwestern Ontario was made in 1832 by a German geographer from the University of Kiel, and he doubtless pointed out the coincidence that this same geographer turned out afterwards to be a high official in the German army.

The idea that the Germans were good colonizers had been exploded. They did not do anything with their colonies. They had taken over Belgium and immigrants did not go to German colonies. Figures had shown that an average of some 25,000 people or eight families a year had migrated from Germany to her colonies.

SELECTED RECIPES

MAKE IT BRANBURGER

Like a guard of honor, trusty branburgers are ready to do their duty at the picnic lunch. Each one is bound in its own little package of butter and wrapped in wax paper. Every one of them is a little bit of heaven, what better place to do that than right "on the spot." Cooked over the open fire, branburgers take time in appetite satisfaction after a picnic lunch. Branburgers are made with a high in taste delight and a little bit of such. Branburgers contain the Spanish Sauce. It will add a continental flavor to your branburgers.

Bransburgers

1 egg
1 1/2 teaspoons salt
1 1/2 teaspoons pepper
1 cup milk
1 cup oil
1 cup bran
2 tablespoons finely chopped onion
1 tablespoon chopped parsley
10 slices bacon

Beat egg and add salt, pepper, milk and bran. Combine meat with onion and parsley. Add the beaten egg and mix well. Form into cakes about two inches in diameter and one inch thick. Wrap slice of bacon around each cake and fasten with skewer. Bake in oven (450 degrees F.) for 20 minutes or 30 minutes. Serve with Spanish Sauce.

Note: Half cup grated cheese may be sprinkled over top of Branburgers before the last 10 minutes of cooking.

Spanish Sauce

1 1/2 cups tomato sauce
1 1/2 tablespoons fat
1/2 cup chopped green pepper
1/2 cup onion
1 1/2 teaspoons salt
1/2 cup milk
2 teaspoons Worcestershire sauce
1/2 cup ketchup
Brown onions lightly in the fat. Add green pepper, tomatoes and seasonings. Stir in oil and heat thoroughly. Yield: Three cups sauce.

Idea Under Consideration

Manitoba Government Plans Trapping Of Muskrats To Help Industry

Trapping of a million and a half muskrats annually in the Saskatchewan River delta area may be made possible by a 10-year program of development under consideration by the Manitoba government.

Premier John Bracken states that with an industry, work would be provided for the community adjacent to the Pas exceeding \$2,000,000 a year. Five years ago that number was practically no muskrats in this area. It is now estimated that as a result of the conservation work done, the rat population before present trapping started was 300,000," states Mr. Bracken.

Was Once A Joke

How Process Of Inside Frosting Of Electric Light Bulbs Started

The Christian Science Monitor carries an interesting story on how the process of frosting electric light bulbs on the inside was discovered. The problem was a "gag" piece of research assigned new apprentices in one big electrical equipment company. One researcher failed to realize that he was being kidded, and turned up with a process which not only, has multiplied only 32 times in the past but added materially to the finished bulb's strength.

Ask for BEE HIVE

An Ingenious Pilot

Used Cheesing Gum To Repair Holes

How a flight lieutenant patched two bullet holes in his engine with chewing gum after being forced down by six German fighters, and how his command was told by the British air ministry.

The aviator was attacked, said the statement, over eastern Belgium in the early days of the German push, and landed in a field.

With the help of peasants, he covered the plane with branches to camouflage it, and German bombers passed over without spotting him. His plane was undamaged except for two small holes in the engine. At the nearest town he bought gasoline and a package of chewing gum.

"I chewed that gum for a bit to get it tacky and then plugged the holes," he said. "It set very well, it got oil and petrol put in, took off, and so came home."

Not Affected By Change

Salaries Cut At No. 10 Downing Street Says No

When Mr. and Mrs. Neville Chamberlain, after three years' residence at No. 10 Downing street, moved out to make way for Prime Minister Winston Churchill, they took the family bird bath along with them.

Promoted from Chancellor of the Exchequer to Premier, in May, 1937, Chamberlain made sure that the bath followed him from No. 11 Downing street, traditional home of the treasury chief, to the garden of No. 10. It has now been moved to a private house, since Chamberlain, as Lord President of the Privy Council, does not rate an official residence.

Bob, the salaried Downing street cat, who can claim as direct ancestor an animal named by Cardinal Wolsey, is not affected by the cabinet shake-up.

New York City's population has multiplied 150 times since 1790. The population of the United States, as a whole, has multiplied only 32 times in the same period.

Vast Picture Crowds

Movie Audiences In United States Run Into Millions

Wondering at the size of motion-picture audiences at this late day is almost like trying to decide whether the automobile has a place in modern life. Nevertheless, there is a leap for the imagination in the thought of something like 800,000 persons witnessing the same screen play in a single theatre in the space of six weeks, even if the theatre is the largest of its kind in the largest city in the United States.

Something between eighty million and ninety million people go every week to the pictures in this country. In the course of six weeks this means half a billion patrons, about four times the present population of the country, a truly stupendous figure. But for a moment the specific number of 20,000 people a day, after day for six weeks in a single theatre, is actually the more impressive.

—New York Times.

Had Something To Say

Pompous Orator Had Great Opinion Of His Radio Address

Malcolm W. Binney, in the Detroit Free Press, said years ago when the radio was young, there was one of these civic outbursts of some kind in Detroit. A pompous orator of the old school was scheduled to make the speech of the day. He was all a "twitter" because it was to be a broadcast. He asked me to read it; it was of the type that would over the air, I did not have to read it; it was all I had to do was hear it. He had written a volume.

"This, my dear sir," I told him, "would take an hour to read even if it were cut in half. And you have only 15 minutes before the microphone."

He was stunned. "I can't," he insisted, "reduce this down to 15 minutes."

"Lincen took only 110 words for his Gettysburg Address," I reminded him.

"I know that," he sputtered, "but then, damn it, all, don't you see, I have something to say!"

Old-Fashioned Spelling Bee

Was Good Discipline With Plenty Of Fun

The Guelph, Ont. Mercury, says: It is probably true that our grandparents were better spellers than we are. They were drilled in the old-fashioned way, being obliged to stand up and spell before the whole school. "Headmarks" in spelling classes counted those days, and if a boy or girl split "hemorrhage" with one "r," the chances were they never forgot that is not the way to spell it. The old-fashioned spelling bee has lost much of its charm. It is good discipline with a lot of fun to boot.

New "Plane Detector" A secret, supersensitive airplane detector which pierces all fog and darkness to give defending fighters a vital, 15-minute warning of approaching enemy aircraft, has been perfected by the United States army, says a chain of coastal lookout stations.

England imports more eggs than the rest of the world combined. Its main sources of supply are Australia, New Zealand, Ireland and the Netherlands.

IN THE QUAIN BOOK OF THE 16th CENTURY

In 300 years the art of brewing became an important industry in England. First in the 13th century brewing became known through waters of Burton on the Trent. Of the many books on the subject of Beer, one in particular deserves special mention. In 1573, H. Knarr published a work in five volumes at Erfurt with the quaint title: "On the Divine Noble Gift, the Philosophical High and Wonderful Art of Brewing Beer."

SUGGEST REMEDY FOR GOSSIPERS

(Communicated)

Many stories circulate around town and I cannot but help think "Take heed what you hear" as to rumors and insinuations. There is a vast amount of defamation in the world. Perhaps we have all suffered more or less by its hand. One would think we might be prepared to estimate it at its real value. But notwithstanding our own experience is regard to its evils, how prone we are to listen to what evil tongues may say of our neighbors' good, jealous enough for our own reputation we seem to have little concern for that of others. We should remember that we have no more right to hear what evil tongues may say, than evil tongues have to say what they ought not. We could not give the tongue of slander a more pointed and successful rebuke than to refuse to listen to it. If we are watchful of our ears, others would be constrained to baffle their tongues. If all men were deaf and blind there would be no slander, because there would be none to hear or read of it, and the unruly member would of necessity be kept in order. But now there are hearers and readers, and hence the tongue and pen must be guarded. Idle words are often the cause of estimable mischief. A good name is rather to be chosen than riches. But the tongue of slander may rob us of our good name and hence we poor individuals of have been made of peace and happiness of individuals, of families, of neighborhoods by an evil tongue. What were but trifles and difficulties by repetition, and thus fortifies which a single word might have excited and headed, increases in magnitude and at last becomes incurable. The tongue will be evil while the heart is wrong, for out of the abundance of the heart the mouth speaketh. The best remedy for an evil tongue is a new heart, but as even the best of us are sanctified in part, we must adopt such a remedy as will meet the evil from whatever source it may come, and this is the remedy: Take heed of what you hear. We must refuse to listen to what the evil tongue says, listening to slander is so nearly related to slander itself that, if we give place to the one, we are likely to be infected with the other. The listener is partner with the speaker; therefore, at all times, now and ever, take heed of what you hear—don't hear everything, and don't repeat everything you hear.

Every industry, be it large or small, adds to the progress and prosperity of any community. Every such industry brings new capital to a town, and distributes this among the business men generally in the way of wages and salaries. Everybody benefits. Among local industries there are none of greater importance in any community than that of the local home newspaper. Not only does it provide work but it also a service to the community which could be obtained in no other way. In their own interests, therefore, business men should use their local paper for purposes of advertising, and also for the procuring of their requirements in printing. All business men need printed matter of various kinds from time to time. Remember your local printing office when in need of printed matter.

service and pleading of a huge influx of cash customers whose dollars are to Canada what bombs, planes and shells are to the fighting men overseas.
These points are stressed because of misguided criticism which the Dominion and Provincial governments are trying to offset. The criticism deals with the fancied dangers of tourists as an entree for fifth columnists. It is bad patriotism because it does not take into account several factors. There are (1) that the Royal Canadian Mounted Police is still as efficient as ever; (2) that fifth columnists hoping to reach Canada will hardly wait for the tourist advertising to tempt them; (3) that opposition to the Canadian tourist trade is exactly in line with the efforts of Nazi agents in U.S.; that Canada vitally needs American dollars. The tourist dollar is the best dollar of all.
As is well known Canada and the Mother Country are doing extensive cash-and-carry war business with the United States. The search for the cash is centered largely in the

tourist trade Last year American tourists left \$202,000,000 in Canada. This year it is hoped to induce them to leave \$300,000,000. In normal years, Americans spend half a billion dollars on holidays abroad. This year Canada is "abroad"—European and Near Eastern traffic being stopped. Should Americans leave this year this year the amount anticipated, they will have swelled Canadian coffers by half as much again as her entire production of gold.

It has been estimated, too, that for each \$55 incoming tourists, one Canadian is gainfully employed by their spending during the length of their stay. The American Hotel Association declares that the tourist dollar is broken down as follows: restaurant, 31 cents; hotel 25; restaurant, 18; garage, 10; theatre, 8; miscellaneous, 12. That is a pretty broad spread over a community.

Last year American tourists brought us enough money to buy all the iron and steel products we purchased from their country—with a handsome million dollars to spare. While the war has greatly enhanced this buying, it is nevertheless true that one again they will help us to help the Mother Country and the boys overseas. Various agents south of the border recognize this. They have sent at great pains to put Canada in discredit as a vacation land. The Dominion Government has been at great pains to dispel all doubts. The provincial government has a representative at present in S.W. swatting rumors and creating goodwill.

THE WORLD OF WHEAT

BY H. G. L. STRANGE
Director, Research Department
Searle Grain Company, Limited

The season for summerfallowing is here. Because the most important factor which limits the yield of all crops is moisture, summerfallowing usually performed in order to conserve extra moisture in the soil for next years crop.

Now the record shows that the best rains fall during the month of June, and often early in June. It is important therefore, that summerfallowing should be done as early as possible in June, for the simple reason that much of the rain which falls before it is summerfallowing is lost by evaporation in the hot air when the soil is turned up and the operation of plowing or cultivating.

Keeping in mind the importance of conserving moisture in the soil, it is obvious that the less summerfallowing is disturbed, after the first ploughing or cultivating the more moisture is likely to be conserved.

**A SQUARE PEG
in a Round Hole**
You may be alright, but you are in the wrong position if you are like a square peg in a round hole. You want a position where you fit. This paper is read by intelligent business men, and a Want Ad. in our classified columns will reach them.

CLASSIFIED ADS

Notice under this heading 10 words or under 50c. first insertion and 25c. each subsequent insertion 3 weeks \$1.00. Over 15 words one cent per word for each week time.

GLEICHEN COMMUNITY HALL

TOWN OF GLEICHEN

Notice is hereby given, that under the provisions of the Tax Recovery Act, 1936, the Town of Gleichen, will offer for sale by public auction, in the Town Office, Gleichen, Alberta, on Thursday, the 1st day of August, 1940, at 2 o'clock in the afternoon, the following parcels of land:

Lots	Block	Plan
All 8 and part 9	8	752N
20-22	8	752N
9-10	9	752N
1-2	10	752N
10-20	11	752N

Each parcel will be offered for sale subject to the approval of the Minister of Public Affairs, and subject to a reserve bid, and to the resolutions contained in the existing certificate of title.

Taxes, cash, unless otherwise arranged.

Redemption may be effected by the payment of the full amount of arrears of taxes and costs, at any time prior to the sale.

W. J. PHYTHIAN,
Secretary-Treasurer.

and so the higher the crop yield will be the next year.
Naturally, of course sufficient cultivation must be done during the season to keep down any heavy growth of weeds for tall weeds will certainly steal a great deal if not all the moisture that the summerfallow has conserved.

Have you any news to tell the editor or if so he will be glad to publish it. In case you do not happen to meet him on the street use the telephone or the mail. You will be helping make the local paper of greater interest and thereby serve the general community. Whatever news may interest you, must surely interest others.

Speaking of plastic surgery there should be some way to transfer bone from the head to the back.
